INTELLIGENT CHARGING FOR WAREHOUSE MHE

With the Selectiva 1kW battery charger, Fronius offers an efficient and reliable solution for charging 24 V traction batteries used to charge PPT's, LLOP's and Stackers.

INTELLIGENT AND INNOVATIVE CHARGING

The intelligent Active Inverter Technology and the innovative Ri charging process take into account the individual condition of each battery during charging, increasing its service life and saving energy in the process. The LED lights on the charger easily show the user the state of charge of the battery so they can choose the most charged that will therefore run for the longest time.

SMALL BUT MIGHTY

At just 4kg, these lightweight and compact chargers can be easily transported to wherever they are needed and installed in the smallest of spaces - perfect for companies where space is limited or those involved in the rental of warehouse MHE. The Selectiva 1kW battery chargers are also IP40 rated.

The advantages:

- / Intelligent charging technology that adapts to the state and health of the battery
- / Mechanically robust housing
- / Compact and lightweight
- / LED display for ease of use
- / Easy to transport
- / Up to 93% efficiency
- / 5 year warranty as standard (full terms on website)
